**Action plan for PLO #2-CFE 201 Learning Plan Project**

For Fall 2011, try a different collaborative approach to this project. Students will self-select membership in a work group of 3 to 4 students. These students will introduce the project in their respective fieldwork sites using the same groups of raw materials. Rather than exclusively using clay, students will be divided into exploration groups such as: Recyclables, 3D Construction, Paper and Cardboard, Natural Materials, Drawing and Painting, Fabric and Textiles, or Light and Color. Opportunities to brainstorm, add new materials, analyze documentation data from the project, etc. will be supported and encouraged in class. Handouts that provide specific direction and open-ended exploration questions will be posted on myAVC throughout the semester. It is expected increased direction from the course instructor as a well as the collaborative per group may increase student success in this project.

**Relationships (Measure | Outcome/Objective):**
